

CHASSIS²
TECHNICAL BULLETIN 1
VERTICAL FENCE

Issue 1, 26th Feb 2009

CHASSIS²

TECHNICAL BULLETIN 1

VERTICAL FENCE

Applicability

CHASSIS² PRO and CHASSIS² SuperPRO equipped with Extruded Aluminium Vertical Fence

This does not apply to units with fabricated steel Vertical Fence

Issue

Vertical face is slightly under 90°.

Cause

Material not to Specification

Action

Customers are requested to check the fence and if possible correct with the following procedure. If customers are unable or unwilling to do this Avonside Works will exchange for a correct version free of charge. Customers may wish to upgrade to the new fabricated design, this will be offered at a preferential price. To exchange, or to please contact sales@avonsideworks.com

CHASSIS²

TECHNICAL BULLETIN 1

VERTICAL FENCE

Procedure

Check if the fence is 90° against a square. If you see daylight then it is under 90°, we have seen some cases where there is no problem, but many are under 90°

CHASSIS²

TECHNICAL BULLETIN 1

VERTICAL FENCE

Hold fence in a bench vice:
